DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, 21-30, 94-100 and 139, 140, and 144-145, drawn to a spa control system, classified in class 700, subclass 275.
 - II. Claims 141 and 142, drawn to a method of selling spas, classified in class 710, subclass 240.
 - III. Claim 143, drawn to a method of doing spa repair, classified in class 700, subclass 17.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions II and III have separate utility as methods of doing business using invention I. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II and III is not required for Group I, restriction for examination purposes as indicated is proper.
4. A telephone call was made to John Ross on March 20, 2004 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 2125

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
